SOC Degree Network System Overview

The SOC Degree Network System (DNS) consists of institutions selected to deliver specific associate and bachelor's degree programs to Service members. The SOC DNS includes:

- Degree Network System-2 for associate degrees; and
- Degree Network System-4 for bachelor's degrees.

The SOC DNS-2 and the SOC DNS-4 function as separate systems (e.g., an institution may participate in the SOC DNS-4 exclusively, or it may participate in both systems).

Membership

SOC DNS institutions are required to meet a number of institutional and degree membership criteria for participation in the system. Generally when seeking new member institutions or new or additional degree programs, the DNS will publish a Call for Programs to all institutions that are signatories of the DOD MOU. The Calls for Programs will focus on specific degree programs that are being solicited at that time.

Institutional members of the SOC DNS agree to special requirements and obligations that provide military students with opportunities to complete college degrees without suffering loss of academic credit because of changes of duty station or other demands of military career. Additional membership expectations are outlined under the Role of the SOC DNS Point-of-Contact section of this chapter.

Benefits to Institutions from SOC DNS Membership

SOC DNS membership institutions have demonstrated their commitment to Service members pursuing educational goals while balancing the challenges of active military service. Accordingly, SOC DNS membership serves to assure Service members of this commitment, as well as to provide higher visibility within the military voluntary education community. DNS member schools also provide details of their academic policies and degree programs in the DNS informational media.

Responsibilities of Membership and the Role of the SOC Degree Network System Points-of-Contact (POC)

The Main SOC DNS POC is Responsible For:

- understanding the Student Agreement process and coordinating the creation and submission of Student Agreements for military students who have selected the institution as their DNS home college;
- providing advisement/academic counseling to the student or referring them to an advisor;
- keeping SOC staff informed of institutional changes as they occur;
- SOC DNS Student Agreement policy and procedures;
- understanding the features of the Joint Services Transcript (JST);
- withdrawal and drop procedures, especially how they relate to students who must suspend their course attendance due to military obligations; this includes the provisions of the U. S. Department of Education Readmission Policy and the HEROES Act of 2003;
- guaranteed two-way transfer of courses in SOC DNS Course Category Codes;
- working directly with SOC DNS personnel to maintain the requisite level of course transferability for degree programs in Guaranteed-Transfer Networks; and
- ensuring that all components of the institution are familiar with the needs of military students—these include bursar, registrar and advisement services.

The SOC DNS conducts an annual cycle of program review and informational updates. Each member institution is required to identify one main Point-of-Contact (POC) to receive all SOC DNS communications. Having a single contact for all SOC DNS matters is critical to maintaining effective communication between the SOC DNS and institutions. Institutions are asked to notify SOC immediately of any changes to POC information so that SOC may update its records accordingly.

Specific Annual Tasks for the SOC DNS POC

- acting as liaison with the DNS during the annual membership Performance Review. The Performance Review serves as an evaluation process for the school's participation in the DNS;
- providing an annual report of military graduates in the requested format by the required deadline;
- responding to the annual SOC Degree Network System Handbook update request by the deadline stated in the request;
- coordinating the response to SOC DNS Course Category circulations within the allotted time frame.

Key Components of the SOC Degree Network System

Networks

A SOC DNS Academic Network consists of a number of degree programs in a single academic area offered by SOC DNS member institutions. DNS degrees are generally offered through a variety of delivery methods, including distance learning, traditional classroom setting, and prior learning assessment. Some member institutions offer traditional and/or blended learning opportunities at a variety of military installations. **Member degrees** must achieve a 40 percent standard of two-way Guaranteed Transferability in major and major related courses. Courses with two-way Guaranteed Transferability are listed in the SOC DNS Transferability Tables.

Guaranteed-Transfer Networks for bachelor's degrees are:

- Accounting
- Business Administration
- Computer Studies
- Criminal Justice
- Education/Instructional Development
- General Business
- Health Services Management
- Homeland Security
- Human Resource Management
- Information Systems Management
- Management
- Marketing/Retailing
- Psychology
- Technical Management

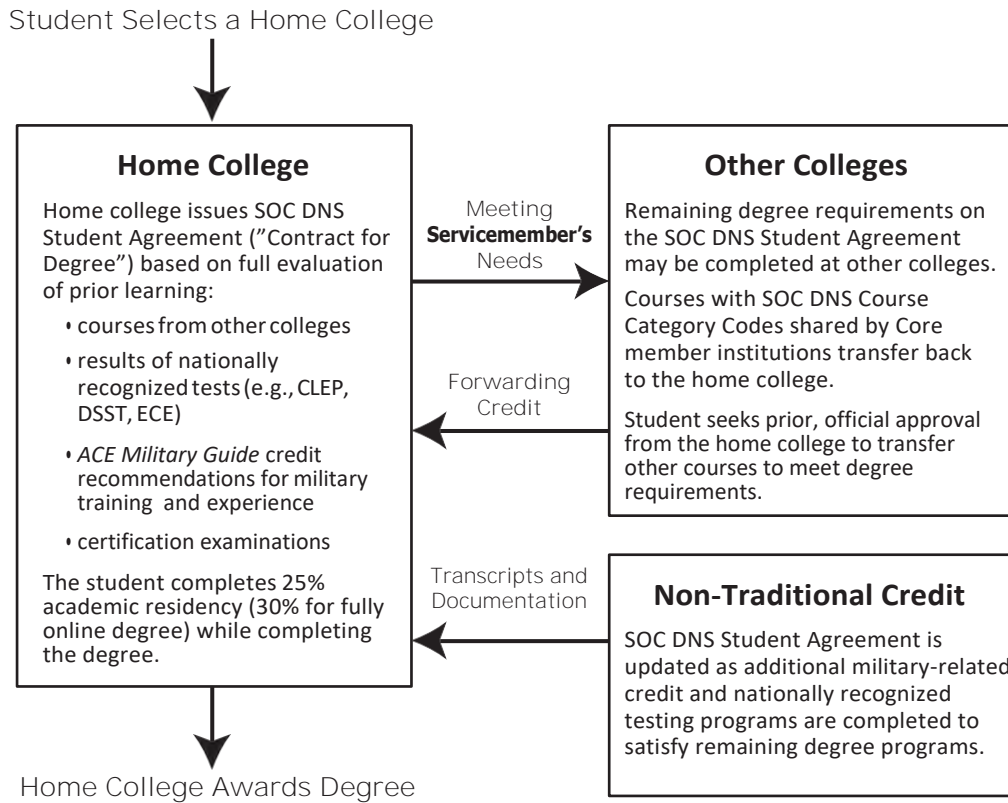

Guaranteed Transferability and SOC DNS Course Categories

The Guaranteed-Transfer Networks are designed to maximize guaranteed transferability for as many major and major-related course requirements listed in degree programs as possible. Students complete degree requirements as they change locations during their military careers without loss or duplication of credit, or respond to other demands of a military career.

A SOC Degree Network System Course Category Code is established whenever a group of institutions agrees to accept courses in transfer from each other that are comparable in content. All comparable courses that have been reviewed and accepted in transfer by Core member institutions in a particular Course Category are displayed in the Transferability Tables under that Code. Core member institutions sharing the same SOC DNS Course Category must accept each other's courses in those categories in transfer without prior approval. See Chapter 5 for a more complete discussion of SOC DNS Course Categories and transferability policies.

Home College

The SOC DNS member institution from which the Service member is seeking a degree is designated the "home college." The home college is responsible for issuing a SOC DNS Student Agreement (Student Agreement) when the student has completed his or her first two courses at that school.

Academic Residency

SOC DNS member institutions must limit academic residency to 25 percent or less of the total degree program and not require a “final year” or “final semester” residency requirement. The only exception is when a degree may be completed entirely online the residency requirement may be increased to 30 percent. Participating institutions that offer degrees through the learning assessment method often require substantially less than 25 percent academic residency.

Degree Program Delivery Methods

The SOC DNS incorporates three program delivery methods: traditional classroom-based instruction and two external degree delivery methods—distance learning and learning assessment. Distance learning degrees in the SOC DNS are those degrees in which the majority of required credits are available to Service members through a distance delivery mode (e.g. Internet, video, teleconferencing, correspondence etc.), from the home college. Learning assessment usually requires little or no academic residency and may be based on college credits derived from evaluation of learning from nontraditional sources such as standardized testing, demonstration of competency from extra institutional learning that relates to academic learning or transfer of credit from other institutions.

SOC DNS Student Agreements

Every SOC DNS member institution must issue a Student Agreement for degree programs listed in the Degree Network System to each degree-seeking student who has chosen that institution as his/her home college. The Student Agreement must be issued early in the student’s enrollment at the college, when the home college has received all of the student’s relevant transcripts, or when the student has completed six semester hours with the home college. The Student Agreement is an official evaluation of the student’s prior learning, including courses taken from other institutions, military training school courses, military occupational experience (MOS or Rating), and nationally recognized examination programs. The Student Agreement serves as a degree plan so that the student has a complete assessment of remaining degree requirements. See Chapter 2 for a more complete discussion of Student Agreements. It also serves as a contract-for-degree that protects the student from changes to their degree program that may occur because of deployment or other military-related interruptions to their studies.

Family Member Participation

Adult family members who attend a SOC Degree Network System member institution are entitled to many of the same policies and benefits as the Service member. These include a SOC DNS Student Agreement, use of two-way Guaranteed-Transfer, reduced academic residency, etc. An adult family member is defined as a spouse or adult child of the military member. While member institutions are not required to complete Student Agreements for family members and do not submit them to the SOC DNS for processing, they may offer them to family members.

Completing Degrees After Military Service

All SOC DNS member institutions must continue to honor Student Agreements even after the student leaves the military. Student Agreements remain valid as long as the student does not exceed the school's degree completion time limit or break-in-attendance policy. Degree completion time and attendance policies vary by college.

SOC Degree Network System Credit Evaluation Supplement

The *SOC Degree Network System Credit Evaluation Supplement (Credit Evaluation Supplement)* is a resource designed for use with the *SOC Degree Network System-2* and *-4 Handbooks* and the American Council on Education's (*ACE*) *Guide to the Evaluation of Educational Experiences in the Armed Services (ACE Military Guide)*.

The *Credit Evaluation Supplement* contains tables that suggest appropriate mappings to SOC DNS Course Categories of the following:

- Subject Area terms contained in service school and occupational exhibits in the *ACE Military Guide*—listed in Section 1, ACE Subject Area Terms Mapped to SOC DNS Course Categories
- ACE-recommended credit for nationally-recognized credit-by-examination programs including College-Level Examination Program (CLEP), DSST, and Excelsior College Examinations (ECE) / UExcel®—listed in Section 2, Examination Credit Tables
- Community College of the Air Force (CCAF) courses—listed in Section 2, CCAF Course Mapping Table
- DANTES Independent Study Course Codes/Subject Areas—listed in Section 2, DANTES ISC Code Tables for associate and bachelor's degrees

The mapping of *ACE Military Guide* credit recommendations to SOC DNS Course Categories should optimize the academic placement guidelines of *ACE*

Military Guide-recommended credit toward SOC DNS degree programs. College counselors and evaluators are encouraged to consider these recommendations when evaluating and applying credit to degree requirements appearing on Student Agreements. The recommended placement of these credits appears on the Joint Services Transcript Summary page.

Using the SOC DNS Handbooks

Chapter 1: Overview of the SOC Degree Network System

Chapter 2: Student Agreement

This chapter provides detailed information about the importance of the SOC DNS Student Agreement and the policies and requirements governing its use.

Look in Chapter 2 for:

- Importance of a Student Agreement including what data is collected, what protections it affords the military student.
- How colleges/universities should properly complete, issue, and distribute a SOC DNS Student Agreement.
- Information regarding Open Network Student Agreements.

Chapter 3: Colleges and Degree Programs

This chapter provides details about the individual SOC DNS colleges and universities.

Look in Chapter 3 for listings of SOC DNS member schools, their degree programs, academic policies, and contact information.

Chapter 4: Member School Locations

Look in Chapter 4 to find out which colleges offer degrees at your current or next duty station. The SOC DNS website offers a search function enabling students to find SOC DNS member schools by location, or degree. Chapter 4 of the *SOC DNS Handbooks* also provides a state-by-state, country-by-country listing of member schools offering traditional classes at off-site locations / satellite campuses—many of which are military bases throughout the world.

Chapter 5: Transferability Policies

Students wishing to take a course away from their home college should search the Course Category Codes to identify schools/courses they may attend that provide guaranteed transferability to and from their home college and degree plan.

Chapter 6: Student Information

This chapter is specifically for military students. It discusses steps to getting starting, the SOC Student Agreement, and how to use the *SOC DNS Handbook*.

Appendix

This section of the SOC DNS Handbook is a useful resource that includes:

- definitions of terms used throughout the *SOC DNS Handbook*;
- a semester/quarter hour conversion chart; and,
- the SOC DNS Course Approval Form.

Chapter 2

Student Agreement

Overview	2-2
The Importance of the SOC Degree Network System Student Agreement	2-2
Student Agreements Requirements	2-2
Distributing Copies of the Student Agreement.....	2-2
Changes to the Student Agreement	2-3
Issuing Open Network Student Agreements	2-3

Overview

Chapter 2 provides detailed information about the importance of the Servicemembers Opportunity Colleges (SOC) Degree Network System (DNS) Student Agreement and the policies and requirements governing its use.

While addressed primarily to colleges and college counselors or advisers, this chapter contains information that will help military education center personnel and Service members understand the importance of the Student Agreement and how it can be used to help Service members attain their education goals.

The Importance of the SOC Degree Network System Student Agreement

Student Agreements should be issued to active duty Service members (not veterans.) National Guard members and Reserve components called to active duty should also be issued Student Agreements by home colleges. The Student Agreement provides the military student with:

- a clearly defined degree plan in a standard format;
- an official evaluation of all previously completed credit applicable to the degree, including transfer credit from other colleges and universities, non-traditional forms of credit from military training courses, military occupational experience, and nationally recognized testing programs;
- protection against changing college degree requirements or policies while the Student Agreement is in effect; and
- identification of guaranteed-transfer credit for specific courses from Degree Network System member institutions with assigned SOC DNS Course Category Codes for these courses.

SOC reports data from the Student Agreements member institutions prepare for eligible students. The types of data reported include:

- the amount and type of applicable credit for military and non-traditional credit awarded by member institutions, including military training, military occupational experience, and nationally recognized testing programs;
- the number of servicemembers receiving Student Agreements and their participation by academic areas; and,

- the distribution of participating servicemembers by branch of service, pay grade, and military installation.

This data serves many purposes, including demonstrating the viability of SOC DNS member institutions and their support of Servicemembers, and the cost-savings achieved by the documented award of non-traditional college credit.

Student Agreements Requirements

A student's home college is required to issue a Student Agreement. It is an official evaluation of a student's prior education and experience as it applies to his or her degree program.

The Student Agreement should be issued by the time the student has completed six semester hours, or two courses, at the home college. SOC recommends that colleges establish a systematic process for early identification of degree-seeking military students to ensure that they receive Student Agreements as appropriate. It is not necessary for a college to issue a Student Agreement to a student taking courses to apply to another school's degree program.

Student Agreements for two-year programs (DNS-2) may be issued only by institutions who are members of the DNS-2, and Student Agreements for four-year programs (DNS-4) may only be issued by DNS-4 members. Member institutions are also encouraged to issue Open Network Student Agreements for servicemembers pursuing degree programs not included in the DNS. See "Issuing Open Network Student Agreements," below, for more information. Student Agreements must be signed by a college official.

It is highly recommended that each SOC DNS institution use the SOC-provided Excel template to develop a master template for each of its SOC DNS degrees. These can be easily customized as desired but must conform to the data requirements of the SOC-provided template.

Distributing Copies of the Student Agreement

The home college retains the official copy of the Student Agreement for tracking and recording the student's progress toward degree completion. Copies of the Student Agreement are to be distributed to:

- the student, signed by the authorized home college official;
- the Service, for the student's education file; and,
- SOC, using the Student Agreement form on the website at www.gosoced.org/student-agreements

Changes to the Student Agreement

Student Agreements may be altered for a limited number of reasons that are generally beyond the control of the institution. These include changes that are required by accreditation bodies, mandated by state higher education authority; and state licensure or certification requirements.

Usually these types of modifications should only affect courses not yet taken by the student. Documentation of these changes may be required upon request from SOC and the military education center. They do not invalidate the Student Agreement nor reset the time to degree completion outlined in Chapter 3 of the *SOC Degree Network System Handbooks*.

Each Service member holding an official Student Agreement for the affected degree should receive:

- proper advisement regarding the relative merits of the changes;
- clear and timely official communication (preferably written or electronic) from the institution in advance of the proposed program change regarding the anticipated impact of the changes on enrolled students (including applicable periods of grandfathering, potential employment impact on state licensing or state certification within the career industry, etc.);
- advisement regarding student options to remain in their current degree plan or pursue the new degree plan, any potential course substitutions, additional courses, etc. and the relative merits of each option; and
- documentation of degree plan changes for submission to military education staff, if the student voluntarily agrees to a degree plan including updated requirements.
- students with questions should contact the home college regarding the degree or SOC if there are specific questions about the Student Agreement.

Issuing Open Network Student Agreements

SOC DNS member institutions may find that their military students pursue degrees that are not part of the DNS. Although not required to do so, colleges are encouraged to create a Student Agreement for these students. In such cases, the Student Agreement is completed in the regular way, except that “Open Network” is entered instead of the assigned Network. When completing these “Open Network” Student Agreements, a college should enter SOC DNS Course Category Codes for any of its courses that are listed in the Transferability Tables. Completing Open Network Student Agreements provides SOC with valuable information, including level and types of degree interest, and data regarding non-traditional credit award.

Introduction

Chapter 3 contains information that will be helpful to students researching participating Servicemember Opportunity Colleges (SOC) Degree Network System (DNS) member institutions. This information includes degree programs offered, academic and admissions policies and procedures, and points of contact.

The College Information pages in this section are arranged alphabetically by college name and provide details about each institution's SOC Degree Network System participation and academic program requirements. Data presented on the College Information pages are provided by member institutions and are updated at least annually. More detailed information may be obtained by contacting the institution directly.

Member School Locations

This Chapter provides a listing by state or country of off-site locations/satellite campuses, including military installations where SOC DNS member institutions offer traditional classroom learning opportunities. This information is updated at least annually. Depending on the

school or degree program, general education courses that fulfill essentially any degree program requirements may be offered, or some degree programs may be offered at that base in their entirety. Schools should be contacted directly to identify specific courses and degree programs offered at these locations.

Chapter 5

Transferability Policies and Tables

Overview	5-2
SOC DNS Course Categories.....	5-2
Using the SOC DNS Course Category Codes with the Student Agreement.....	5-2

Overview

Chapter 5 should be used by college representatives, counselors, and servicemembers who want to understand how courses taken at one college may transfer to another college within the Servicemembers Opportunity Colleges Degree Network System (SOC DNS). The chapter includes information that is key to using the SOC DNS Course Category Codes to determine transfer guarantees.

SOC DNS Course Categories

A SOC DNS Course Category is established whenever a group of SOC Degree Network System member institutions agree to accept each other's comparable courses in transfer. Course content is the main consideration when determining course comparability. SOC DNS Course Category Codes are assigned to SOC DNS member institutions' comparable courses according to their degree programs that are in Guaranteed-Transfer Networks.

Courses pertaining to the major and major-related requirements for degrees in Guaranteed-Transfer Networks are initially analyzed by experts from SOC and, in some cases, college faculty to determine if they fit a SOC DNS Course Category. SOC also categorizes selected courses in General Education subjects that are difficult to transfer. Based on this analysis, courses are tentatively assigned to appropriate SOC DNS Course Category Codes with comparable courses from other member institutions and then are circulated in a peer review process to SOC DNS institutions with courses in, or proposed for, those same Categories. When the peer review is complete, SOC personnel resolve any course rejections and make final SOC DNS Course Category assignments.

The purpose of the SOC DNS Course Category system is to aid counselors and students in the degree-planning process by specifying various courses that are guaranteed in advance to transfer back to a student's home college.

Using the SOC DNS Course Category Codes with the Student Agreement

When a student is unable to take a course required for a degree at his or her home college and needs to identify courses that are guaranteed to transfer back to the home college in place of that specific course, the student may follow the steps below:

1. Find the course number of the required course on the Student Agreement provided by the home college.
2. Look for that course number online in the home college's Course Index on the SOC DNS Search Tool. If the course is found, note its SOC DNS Course Category Code and whether there is a Before Date listed. (If there are multiple entries for the course number, use the one without a Before Date, if one is listed.) If the course is not found, or if all its entries have a Before Date, proceed to Step 6.
3. Under that SOC DNS Category Code, locate the required course from the home college. Check that the course title listed matches the one on the Student Agreement (to make sure the college hasn't changed the course offered with that course number). If the course title does not match, students should contact the home college to determine whether the transfer guarantees still apply for the required course, or if other course substitutions are available.
4. Review the current courses listed in that SOC DNS Course Category (those without a Before Date) from all the other institutions where the student may take a substitute course. These courses are guaranteed to transfer in as the home college's required course in the SOC DNS Course Category without individual prior approval.
5. Please pay special attention to instances where colleges have multiple courses listed in a SOC DNS Course Category.
 - a. Where two or more courses are joined by an "AND", all courses so joined are necessary to fulfill the course requirement in that SOC DNS Course Category.
 - b. When two courses appear in a SOC DNS Course Category without an "AND" between them, either course may be taken to fulfill the course requirement in that SOC DNS Course Category.
 - c. In rare instances, an "AND" or an "OR" is surrounded by hyphens. This indicates a group relationship: courses before and after the hyphenated conjunction are to be treated as a unit.

6. If the course number is not listed, or all its entries have a Before Date, the course is not currently active in a SOC DNS Course Category. In this instance, students are advised to take that course at the home college if possible. If the course cannot be taken there, students should obtain prior approval from the home college for a specific course that will satisfy the degree course requirement and transfer back to the home college. (Use the Course Approval Form in the Appendix.)
7. In some cases, institutions will require two courses in a SOC DNS Course Category, while other colleges will require only one. The credits accepted in transfer may also vary by course or degree. When a student earns more credits in a SOC DNS Course Category than the home college requires, the excess credits should be used first to fulfill appropriate subject-specific elective requirements and second to meet free elective requirements. When a student earns fewer credits in a SOC DNS Course Category than the home college requires, the shortage should be made up with electives in that SOC DNS Course Category subject area or a related subject area as determined by the home college.

Overview

This chapter provides some basic, important information to help students get started in an educational program leading to either an associate or bachelor's degree.

Why Should I Attend a SOC Degree Network System (DNS) School?

The SOC DNS is a group of member schools committed to serving the educational needs of military students at the associate and baccalaureate degree levels. SOC DNS member schools agree to:

- Provide flexible, convenient learning opportunities including online, traditional, and prior learning assessment;
- Grant credit for military training and experience and nationally-recognized testing programs;
- Provide the student with a SOC DNS Student Agreement which serves as a contract-for-degree that protects against degree program changes that may occur during deployments or other operational commitments;
- Offer degree programs with Guaranteed-Transfer credit among other member schools
- Maintain responsive student support systems;
- Require only 25% Academic Residency (30% for degrees offered completely online). Academic Residency is the amount of course work that must be completed at the college where you will complete your degree.

Steps for Getting Started at a SOC DNS School

1. Explore interests, career/degree possibilities, and college/university options with your Education Services Officer. Chapter 3 of the *SOC DNS Handbook* provides a list of SOC member schools and the degree programs they offer within the SOC DNS. Chapter 4 provides a list, by state and foreign country, where some SOC member schools offer traditional classroom learning opportunities.
2. Apply for admission to the college/university of your choice.
3. Request transcripts. Have your Joint Services Transcript (JST) sent to the college you have selected. It should list any other college work you have previously completed, as well as any test scores (e.g., CLEP, DSST, UExcel®). If your JST does not include this information, you should have transcripts from the other schools you have attended, as well as the test scores,

sent directly to the school to which you are applying.

4. You will be officially notified of your acceptance. Throughout the course of your studies, be sure to keep in contact with your home college academic adviser. Make sure that you understand all your degree requirements, including academic residency, requirements in the major, satisfactory academic progress, degree completion time limits and any break-in-attendance policy guidelines.
5. Register for courses that are part of your degree plan. You should always be sure that the courses you take are required for completion of your degree. Check with the academic adviser at your school if you are not sure if the courses you plan to take are appropriate to your degree.
6. Apply for Tuition Assistance (TA) in accordance with current policies stated by your branch of service.
7. Request a SOC DNS Student Agreement from your home college after completion of six academic credits.
8. Follow your SOC DNS Student Agreement to complete degree requirements.
9. Learn more about taking courses at another college. Often students will decide to take a course at another school because of costs, convenience, or desire to use a different course delivery method. Request official approval from your home college before taking a course from another college. A SOC DNS Course Approval Form is provided in the Appendix (Courses sharing SOC DNS Category Codes do not require prior approval). Use Chapter 5 of this Handbook to find courses in SOC DNS Course Categories guaranteed to transfer among SOC DNS member schools.
10. Document Earned Credit: Your Joint Services Transcript will normally be updated if you have advanced in pay grade or complete significant military training. This may result in the granting of additional college credit; you should keep your school informed of any additional tests you may complete, or additional credit recommendations provided by advancement in pay grade or completion of military training.
11. Track your progress. You may indicate on your Student Agreement progress toward degree completion by notating all courses you complete.
12. When you have completed all of the requirements for your degree, file a graduation request or application with your home college.

What is a SOC DNS Student Agreement?

A SOC DNS Student Agreement is a document that your home college must provide to you upon completion of your first six credits of coursework. The home college is the school where you intend to complete your degree. This is different than another school that you might be attending for courses to transfer back to the school where you will complete your degree.

The Student Agreement will serve as your degree plan as well as a contract-for-degree between you and your home college that will protect you from any degree requirement changes. It will contain:

- list all of the courses required for your degree;
- credit you may have been awarded for military training or experience;
- any credit earned via national-recognized testing programs;
- every accepted credit from previously completed college courses; and
- It will provide you opportunities by identifying SOC DNS Course Category Codes that allow you to take certain courses with other schools and transfer them back to your home college, guaranteed.

The Student Agreement will remain in effect while you are deployed, if you transfer duty stations, and after you leave the service.

What is Guaranteed Transferability?

A key feature of SOC DNS member schools is that they have agreed to accept at least 40% of the major or major-related coursework for students transferring between SOC DNS member institutions in similar degree programs. This Guaranteed Transferability is in addition to the acceptance of military transfer credit recommendations and those recommended for nationally recognized testing programs. These transfer policies are meant to provide military students with flexibility, choices, and multiple ways of earning credits. You should always consult with your Education Service Officer and the advisement office of your home college prior to transferring schools, changing majors, or taking courses from another school.

What is Academic Residency?

Academic residency is the percentage of the degree (number of credits) that a student must complete at that school in order to be awarded a degree. Generally, an associate degree is 60 credits, 25% residency for an

associate degree means the student must complete 15 of the 60 credits by taking courses at the home college. Similarly, a bachelor's degree is normally 120 credits, 30 credits completed at that school will constitute 25% residency. Note that if a degree program is offered completely online, the school may require academic residency of 30%.

HEROES Act and Readmission Policy

What should I do if I'm deployed and my studies are interrupted?

SOC DNS member institutions, as signatories of the Department of Defense Memorandum of Understanding, agree to abide by the U. S. Department of Education's Readmission Policy for military servicemembers and the *Higher Education Relief Opportunities for Students (HEROES) Act of 2003*. These, and other legislation, serve to protect military students whose studies are interrupted by military commitments (e.g., withdrawal and reimbursement of tuition payments, deferment on student loans, and returning to school after a disruption because of military service).

Contact your Education Services Officer or Financial Aid Counselor if you need assistance or have questions concerning these policies. You can read these Acts in their entirety at <https://congress.gov/>.

Please note this protection is extended to active duty members of the Armed Forces, reserve, and National Guard called to active duty under federal authority.

If you cannot complete a test or other course requirements on time, there are important steps that you must take:

1. First contact the faculty member teaching the course to see if there is a way you can postpone or make up the work.
2. Notify your home college registrar's office. Every school has a formal withdrawal policy that you must follow. Have a copy of your orders ready for submission.
3. Speak with your education center to discuss necessary action regarding your Tuition Assistance.
4. Advise all holders of your student loans as soon as possible. Loan holders are required by the HEROES Act to provide you with some level of relief, such as deferment or forbearance.

Can I get help paying for school?

Most students serving on active duty are entitled to either military tuition assistance or some form of the GI Bill. Be sure to familiarize yourself with your service's tuition assistance policies and procedures.

Many military-affiliated organizations offer grants, loans, or scholarships to active duty students. Military One Source has a comprehensive website that provides links and information about these programs at <http://www.militaryonesource.mil/>.

Federal grants and loans are also available; information is provided at <https://fafsa.ed.gov/>.

What if I have questions or encounter problems while I'm pursuing my degree?

Your military education center can provide you with assistance, especially with regard to tuition assistance or career advice.

For specific academic issues or concerns, consult your school's academic advisor. Registration problems are generally handled by the registrar's office; financial issues should be addressed to either the bursar's office (payment for specific courses), or to the financial aid office (for student loans, grants, and other assistance).

Appendix

Definitions.....	Appendix 2
Course Transfer Approval	Appendix 3
Conversion of Quarter Hours to Semester Hours	Appendix 4
Conversion of Semester Hours to Quarter Hours	Appendix 4
SOC Degree Network System Course Approval Form.....	Appendix 5

Definitions

Academic Residency - The number of credits a student must complete with the home college to be eligible for a degree. SOC DNS member institutions must limit academic residency to 25 percent or less of the total degree program, specifically avoiding any “final year” or “final semester” residency requirement. The only exception is for institutions that offer 100 percent of an undergraduate degree online; they may require servicemembers to take 30 percent of that degree program from their institutions.

Comparable Courses - Courses that are considered to be equivalent in academic content. Credit hours and/or upper- and lower-level course numbering, however, may vary among comparable courses if the content is deemed to be equivalent. Comparable courses are listed together by SOC DNS Course Category in the Transferability Tables.

Member Institutions – Member institutions offer at least one degree program in a Guaranteed-Transfer Network.

Course Category - See “SOC DNS Course Category”

Degree Network System – See “SOC Degree Network System”

Delivery Methods - Three methods by which SOC DNS member institutions make degrees available to students. They are Traditional Delivery, Distance Learning, and Learning Assessment.

Distance Learning - An external degree delivery method that provides instruction by non-traditional means (e.g., Internet, video, teleconferencing, correspondence) and may require academic residency at a given institution. Distance learning degrees within the SOC DNS are those degrees in which the majority of credit hours required are available to servicemembers through a distance delivery mode from the home college.

Guaranteed-Transfer - The guarantee by each SOC DNS member institution to accept, in transfer from other DNS member institutions, courses in the same SOC DNS Course Categories as comparable to its required courses.

Guaranteed-Transfer Network - A Guaranteed-Transfer Network consists of degrees in a single academic area that must achieve a 40 percent standard of two-way Guaranteed Transferability in major and major-related courses.

Home College - The institution from which the student is seeking a degree. That college issues the SOC DNS Student Agreement and awards the degree to the student when degree requirements are completed.

Learning Assessment - An external degree delivery method that usually requires little or no academic residency and may be based entirely on college credits derived from evaluation of learning from nontraditional sources or transfer of credit from other institutions.

Network - A number of degree programs in a single academic area offered by SOC DNS member institutions at a variety of military installations, through distance learning, or by learning assessment.

Official Evaluation - A determination by the college of academic credits accepted in transfer and awarded for previous formal and non-traditional education and experience and an official notification to the student of those decisions. The awards are guaranteed to the student by the institution as soon as the Student Agreement is issued.

Quarter Hour - An award of academic credit typically resulting from completion of a minimum of 10 classroom hours of study (normally at least 20 are needed for laboratory or shop activities). One quarter hour converts to 2/3 semester hours.

Resident Credits - Academic credits taken with a college/university, whether on campus, at a military installation, at some other off-campus location, or through distance learning.

Semester Hour - An award of academic credit typically resulting from completion of a minimum of 15 classroom hours of study (normally at least 30 are needed for laboratory or shop activities). One semester hour converts to 1.5 quarter hours.

SOC Degree Network System – A group of member institutions selected by the Military Services to deliver specific associate and bachelor’s degree programs to servicemembers. SOC operates the Degree Network System-2 for associate and the Degree Network System-4 for bachelor’s degree programs.

SOC DNS Course Category – A categorization of courses from SOC DNS member institutions that are applicable toward a college degree and have comparable academic content. A SOC DNS Course Category is established whenever a group of SOC DNS member institutions agree to accept each other’s comparable courses in transfer. Each institution with a course in the SOC DNS Course Category has guaranteed that it will accept in transfer each of the courses from other institutions in the Category in place of its own listed course(s). In some cases, multiple courses from an institution must be taken to satisfy a Category’s requirements. Separate Course Categories are maintained for associate and bachelor’s degree programs. SOC DNS Course Categories are identified by a six-character Course Category Code, with associate degree Category Codes ending with “A” and bachelor’s degree Category Codes ending with “B”. Consult the SOC Degree Network System Transferability Tables for a complete list.

SOC DNS Student Agreement - The SOC DNS Student Agreement (Student Agreement) is an official evaluation of the student’s prior learning, including courses taken from other institutions, military training school courses,

military occupational experience (MOS or Rating), and nationally recognized examination programs. The Student Agreement serves as a degree plan so that the student has a complete assessment of remaining degree requirements. Policies, Student Agreement template, and instructions are available in the *SOC Degree Network System Handbook Appendix*, on the *SOC Degree Network System Handbook CD-ROM* and *SOC DNS Web pages*.

Traditional Delivery - A delivery method that includes classroom-based instruction and an academic residency requirement.

Transferability Tables - The listing of courses that are mutually accepted in transfer for each SOC DNS Course Category. Within a Category, these courses are guaranteed to be accepted in transfer in place of the course(s) listed from any other SOC DNS member institution within the same Course Category. Both current and recently-removed courses, or those with a “Before” date, are listed for easy reference. Separate Transferability Tables apply to associate and bachelor’s degree programs.

Course Transfer Approval

Make copies of the SOC Degree Network System Course Approval Form that is reprinted in this section and use it to get the necessary approvals. The appropriate point-of-contact for the home college is identified on the College Information Page in Chapter 3 of the *SOC Degree Network System-4 Handbook*. Examples of when the form can be useful include:

- A student taking a course from another college to satisfy a home college course requirement that does not have a SOC Degree Network System Course Category Code and is not in the Transferability Tables.
- A student taking a course without a SOC Degree Network System Course Category from another college to satisfy a SOC DNS home college course requirement with a CourseCategory.
