#### SCENARIO

QNE Optimum uses the most common way to deploy the client application by installing it on each End-User Workstation. And to update the application to the latest version, we use our online update service. The online updater will download and install the most recent update for you. However, this will become extremely tedious to perform the same steps on each workstation, especially when the internet is not as reliable as you are. QNE Optimum provides another approach to help you to save time in the future. Perform the following steps to automate the update process at multiple workstations.

#### SOLUTION

1<sup>st</sup> Step – Create a shared folder in Server/Main's PC, you can give it an arbitrary name. For instance, name it OptimumUpdateFiles. This folder will store newer application versions.

Name	Date modified	Туре	Size				
BaiduNetdiskDownload	14/02/2020 2:42 PM	File folder					
Delphi Version	01/08/2019 12:19	File folder

	lateFiles			
how me all the network share	s on this computer.			

2<sup>nd</sup> Step – Copy the latest version Setup file, Paste it into OptimumUpdateFiles.

Example Version 2019.1.1.1 is the latest version of QnE Optimum.

> This PC > New Volume (E:) > OptimumUpdateFiles							
	Name	Date modified	Туре	Size			
s	🦓 Setup_2019.1.1.1.exe	03/03/2020 2:04 PM	Application	134,289 KB			
7	Paste into OptiumumUpdate Files Folder						

Note: For Easy to fill in WinApp.Config later, we can rename the application to Setup.exe

3<sup>rd</sup> Step – in End-User Workstation, we right click QnE Software Icon, Click Open File Location,

We will able to find the file which named WinApp.Config.
